

SP-925BT

# The Ultimate Stereo Music Cube

The Genius SP-925BT armed with the latest Bluetooth 4.0 capability is an ideal wireless companion for your smart mobile gadget -- be it your smartphone, tablet or laptop. The SP-925BT is built with two powerful speakers housed on two sides of the cube delivering a full range of 360° projected sound plus a passive radiator base driver subwoofer on the bottom pushing out exceptional bass effect. The speaker offers up to 8 hours of continuous music playback with 4 hours of battery charging. In addition, you won't miss any important calls during music playback as it comes with a built-in microphone. The unmatched performance of this tiny speaker makes you want to have it when you first look at it but want to own it once you hear it.

### Bluetooth 4.0 Technology

SP-925BT, built with a state-of-the-art CSR chipset, streams music wirelessly from any Bluetooth-equipped device, including a wide range of smartphones, tablets and laptops.

### Simple Pairing

When turned on, SP-925BT will enter into pairing mode and enable your mobile device to pair with it without pressing another button. If it was previously paired with a mobile device nearby, it will also connect to it right away.

### 2 Speakers + Subwoofer

Two built-in 5-watt speaker drivers plus a passive radiator base driver subwoofer deliver great stereo sound and is complemented with an extra bass effect.

### Wired is just another option

With the integrated AUX-in function, SP-925BT is ready for plug and play if a wireless option is not available at the time.

### Call-Answer Button

With the built-in microphone and call-answer button, you can answer a call and turn on the microphone to give you a hands-free call environment.
